

Spandana M J

Bengaluru, Karnataka | +91-8431221297 | spandanaspandumj@gmail.com | LinkedIn | GitHub | Portfolio

Technical Skills

Languages: Java, JavaScript, SQL

Frontend: React.js, HTML5, CSS3, Tailwind CSS, JavaScript (ES6+)

Backend: Node.js, Express.js

Database: MongoDB, SQL

Core Concepts: REST APIs, JWT Authentication, Async JavaScript, OOP, Debugging

Tools: Git, GitHub, Postman, VS Code, Roboflow, Google Colab

Experience

Full Stack Developer Intern | **Prinston Smart Engineers (Hybrid)** Feb 2026 – Present

- Developing scalable full-stack web applications using the MERN stack for real-world business workflows.
- Building responsive and reusable frontend components using React.js and Tailwind CSS.
- Designing and integrating RESTful APIs using Node.js and Express.js.
- Collaborating with mentors and team members on debugging, feature development, and deployment.
- Contributing to production-ready modules with focus on clean code and maintainability.

Projects

Lost & Found Web Application | React.js, Node.js, Express.js, MongoDB | Live Demo 2025

- Built a full-stack lost and found platform using React, Node.js, Express, and MongoDB with role-based access control for users and admins.
- Implemented secure JWT authentication with httpOnly cookies, protected routes, session persistence, and rate limiting to prevent brute-force attacks.
- Developed an admin dashboard with item verification, pagination, search/filter, email notifications via Resend, and Cloudinary image uploads; deployed on Vercel + Render.

BlogHub | React.js, Tailwind CSS, Node.js, MongoDB | Live Demo 2024

- Built a production-ready MERN blog platform with secure JWT authentication using httpOnly cookies, protected routes, and role-based admin access.
- Implemented Cloudinary image uploads, TipTap rich text editor, comment moderation, and IP-based unique daily view tracking using MongoDB TTL indexes.
- Added rate limiting, Helmet security, input validation, category filtering, pagination, likes, SEO meta tags.

Arecanut Quality Grading | React.js, Node.js, MongoDB, Python, YOLOv8 | Live Demo 2024

- Developed an AI-powered grading system using YOLOv8 for automated quality classification.
- Applied preprocessing, annotation, and evaluation metrics to improve model performance and consistency.
- Trained the model on 1000+ labeled images for accurate detection and grading.

Blockchain Certificate Verification System | React, Supabase, MetaMask, IPFS | Live Demo 2023

- Developed a full-stack decentralized certificate verification platform with Admin, Student, and Public dashboards and MetaMask wallet authentication.
- Integrated Solidity smart contracts for certificate issuance and verification using keccak256 hashing, tested with Hardhat.
- Used Pinata IPFS for tamper-proof PDF storage and Supabase PostgreSQL for wallet-based certificate retrieval, deployed on Vercel.

Certifications

- SQL (Intermediate) – HackerRank 2025
- Java (Basic) – HackerRank 2025

Education

Canara Engineering College, VTU 2022 – 2026
Bachelor of Engineering in Computer Science & Engineering CGPA: 8.46/10
Master's PU College 2021 – 2022
PCMB 89%
